

.vantronix joins the HP ProCurve Open Network Ecosystem with the integrated Firewall ZL1 solution

Hannover, Germany (January 26, 2009) - *.vantronix | secure systems GmbH, a vendor of high-end security appliances, today announced its Firewall ZL1 product, a high-end firewall solution that integrates with the HP ProCurve Open Network Ecosystem (HP ProCurve ONE). .vantronix developed an optimized enterprise-class security appliance as a switch module and is announcing its participation in the HP ProCurve ONE program.*

Participation in HP ProCurve ONE is an important step for .vantronix to demonstrate its strategy to provide high-end security appliances based on HP ProCurve hardware products..

The Firewall ZL1 product is based on the .vantronix Firewall Operating System, running on the new HP ProCurve ONE Services zl Module. It is designed to meet the criteria of sophisticated enterprise environments and offers not only performance, but also reliable security, scalability, high-availability, redundancy with professional on-time support. The .vantronix product is based on the OpenBSD operating system and features powerful services like Firewalling, Load Balancing, VPN, IPv6 Gateway, and Anti-SPAM applications. Full support for the next generation Internet Protocol IPv6, including proactive firewalling, a powerful secure platform, and interaction with the HP ProCurve Switch 5400zl series – the 5406/5412/8212zl switch chassis as an integrated module are the outstanding features of the product.

“I'm excited about the HP ProCurve ONE Alliance”, said Reyk Flöter, CTO and Co-Founder of .vantronix. “Our Firewall ZL1 product utilizes the benefits of the HP ProCurve ONE platform, which provides customers with the choice of applications and services from leading industry partners.”

“To help customers address the increased pace of change within their

businesses, HP ProCurve is combining its own technology with some of the most innovative, respected and visionary companies in the world,” said Marius Haas, senior vice president and general manager, HP ProCurve.
