

Press release

Compumatica secure networks takes over the technology of .vantronix | secure systems GmbH

Aachen/Hanover, July 19th 2011.- The technology of *.vantronix* products round about cloud security, routing, firewalling and IPv6 will be integrated into the product portfolio of *Compumatica secure networks*.

Compumatica secure networks – provider of high-level security solutions for the protection of highly sensitive data – takes over the technology as well as the existing customer base of *.vantronix | secure systems GmbH*, vendor of high-end security appliances. The takeover includes the integration of an excellent, secure technology for routing and firewalling, based on a solid and proven platform powered by the secure operating system OpenBSD. In the future, this technology will ideally complement the existing product range of *Compumatica*. All *.vantronix* customers and maintenance contracts are taken over as well and will enable *Compumatica* to globally expand their business significantly.

Special emphasis is placed on the migration of *.vantronix* gateways into the *Compumatica* organization: Besides IPv4 the next generation Internet Protocol version 6 (IPv6) is as well fully supported by these gateways.

.vantronix is an HP AllianceONE Select Partner and its security appliances are based on different HP network hardware products. *Compumatica* will continue this collaboration with HP in the future. Worldwide customers and resellers will be provided directly and together with HP. The development team of *.vantronix* is integrated into the *Compumatica* organization in Aachen and will be further strengthened to ensure the high quality standards of products and staff.

Compumatica secure networks – based in Germany and the Netherlands – is a fully independent private company with main task securing IP traffic of its customers.

Compumatica develops, produces and implements high level security solutions for all types of IP networks and all types of customers. These can be small organizations with just a few countrywide connections up to international enterprises with world-wide networks.

Compumatica staff and products meet high standards of reliability and quality. The products are based on systems that are approved, or even certified, according to the strict regulations of the BSI (in Germany) and the NLNCSA (in the Netherlands). Every single product goes through a quality assurance phase in which it is subject to a long-term test. All Compumatica products are backward compatible for more than ten years. Herewith we guarantee our customers investment protection. Our customers are well-known top 500 enterprises as well as government agencies and public organizations in different countries which protect their critical data with the aid of Compumatica systems.

As world-wide approved producer and system integrator Compumatica secure networks provides complete IT security solutions for networks of each size.

The security of your data is our mission – we secure YOUR network.
