

.vantronix Products and Support in Japan

New .vantronix Partner OpenBSD Support Japan Inc. in Tokyo

Hannover/Tokyo (October 29, 2008) - *.vantronix | secure systems GmbH, a German vendor of high-end security appliances, entered a partnership with the Tokyo-based company OpenBSD Support Japan Inc.. The Technical Solutions Partner will provide .vantronix products and a support suitable for demanding corporate and enterprise customers in Japan.*

.vantronix is an emerging vendor of security appliances for a highly professional market. The products are designed to meet the criteria of enterprise environments. Not only performance, but also security without a compromise, scalability, high-availability, redundancy, integration into sophisticated heterogeneous networks and network management systems, and a professional on-time support are the mandatory factors. The .vantronix systems are based on the OpenBSD operating system and feature powerful services like Firewalling, Load Balancing, VPN, IPv6 Gateway, and Anti-SPAM. .vantronix is an optimal solution for the advanced requirements of the Japanese IT market. Full support for the next generation Internet Protocol IPv6, including proactive stateful firewalling, and a powerful secure platform are outstanding features of the .vantronix products.

"I'm proud that we won OpenBSD Support Japan Inc. as a Technical Solutions Partner", says Reyk Flöter, Co-Founder and Technical Director of .vantronix. "They're very professional, have an excellent technical knowledge and are known for their significant contribution to the OpenBSD project and applied security at all." As a Technical Solutions Partner OpenBSD Support Japan Inc. will sell .vantronix products but also provide sophisticated services and support for the customers and other resellers in Japan.
